Introducing Concept of Water Mist

Droplet diameter [m]	Droplet diameter	No of droplets per 1 liter of water	Total cross-section of droplets in 1 cubic meter [sqm]	Total surface area of droplets generated from 1 litre of water [sqm]
0,12	12 cm	1	0,0125	0,05
0,0006	600 microns	8 846 426	2,5	10
0,0001	100 microns	1 910 828 025	15	60
0,00005	50 microns	15 286 624 204	30	120
0,000025	25 microns	122 292 993 631	60	240
0,00001	10 microns	1 910 828 025 478	150	600

Mist is capable of extinguishing all classes of fires

- A - wood, paper, plastic, rubber, foams
- B - diesel fuel, all kinds of oils, chemicals
- C - gases
- D - certain metals
- F - cooking oil
- Electric boards

Zygmunt Lada
14th IWMC, Istanbul, Turkey, 22-23 Oct 2014

Mist Systems

1. Clean agent - pure water
2. Powerful - directed to fire with screening effect
3. Have a cooling effect without thermal shock
4. No collateral damage
5. No danger for people and equipment

RotorMist technology for local applications
Zygmunt Lada
14th IWMC, Istanbul, Turkey, 22-23 Oct 2014

Often asked questions

- How to minimize collateral damage?
- Do we need to flood the whole protected plant?
- Why is mist system so expensive?
- Will the sprinkler system protect the equipment?

Mist extinguishers

Applications

All places, where there are the people, valuable items, food

- All kinds of manufacturing areas
- Kitchens
- Restaurants / Live Cooking areas
- Hotel Lobbies / Common Areas / Laundry etc.
- Shopping malls
- Guest Rooms
- Business Centers
- Computer Rooms / Server Rooms.
