20th International Water Mist Conference (IWMC) to be postponed once again

Hamburg, 13th January 2021. Today, the International Water Mist Association (IWMA), announced that IWMC 2021 will be postponed once again. The IWMA board of directors felt compelled to take these measures as it is unclear what the overall situation around 21st and 22nd April will be like.

“Reluctantly, we have decided to postpone the event, because we do not know what conditions we face if we decided to follow. We would really like to meet face to face, but cannot see this happening in April”, explains IWMA general manager Bettina McDowell.

The venue and the date are currently being re-evaluated. Details of where and when the 20th International Water Mist Conference will take place will be announced as soon as possible.

“We very much hope that the situation will improve and that we can hold the conference in October 2021”, says Bettina McDowell.

The water mist conference is an annual event and the only event solely dedicated to the water mist technology.
