#IWMC2025 – The Programme for the 24th International Water Mist Conference has been released

Hamburg, 28th May 2025. The 24th International Water Mist Conference, brought to you – as always – by the International Water Mist Association (IWMA), will take place in Manchester, UK, on 24th and 25th September.

As of today, the programme, which features a manifoldness of topics, can be viewed on the IWMA webpage under www.iwma.net/iwmc.

“More than 25 speakers from around the world will talk about marine and land-based applications, research, component innovation as well as statistics that prove water mist to be a reliable technology”, says Bettina McDowell, CEO at IWMA.

Max Lakkonen, IWMA President, adds: Whether you are a fire safety expert, an engineer, an installer, a researcher, an insurer, or work for an authority having jurisdiction, this is the must-attend event of 2025.”

One of the highlights will be the bestowal of the Ragnar Wighus Award 2025 (Ph.D.). IWMA has been awarding young scientists who dedicate their theses to water mist technology since 2016.

Two further highlights will be a panel discussion and the exhibition which will – as tradition has it – run alongside the event.
