### **IWMA held Seminar on Fire Protection with Water Mist in Munich, Germany**

**Hamburg, 25<sup>th</sup> November 2015.** On 24<sup>th</sup> November 2015 the International Water Mist Association (IWMA) held a seminar on fire protection with water mist. IWMA had invited 35 delegates – planners, architects, building engineers etc. – to Munich to attend this event. The programme was rich in variety. Speakers included representatives from manufacturers, approval bodies, fire research institutes and insurance companies.

Bettina McDowell, IWMA Association Secretary, says: “People from many different areas attended the seminar. And they met with speakers from many different fields. That made this one-day event so informative.”

Alongside the seminar IWMA had organized an exhibition. During the breaks the delegates had the chance to look at products, brochures showing projects and to ask more detailed questions.

The next IWMA seminar will take place on 8<sup>th</sup> March 2016. Venue will be BRE in Watford near London, UK. FIA and BAFSA have joined in to organize this event.
