### **IWMA to hold 3<sup>rd</sup> Seminar at Intersec Dubai**

**Hamburg, 23<sup>rd</sup> August 2017.** On 21<sup>st</sup> January 2018 the International Water Mist Association (IWMA) will again offer a seminar on fire protection with water mist during Intersec. Venue will be the Dubai International Convention and Exhibition Centre, room Sharjah D. International speakers will talk about standardization, about how water mist works, how it can be implemented/retro-fitted and how Middle East companies can profit from this technology (which uses smaller water droplets thus less water – than traditional sprinkler systems – to control and extinguish fires).

The seminar will begin at 1 p.m. and will finish at about 5 p.m. Apart from the lectures there will be ample time to ask questions, discuss and network.

In 2013 and 2014 between 60 and 80 delegates – mainly from the Middle East region – attended the event which IWMA had organized. About the same number of people is expected to come to the Dubai seminar 2018. There will be no admission fee for attendees.
