IWMA to hold Water Mist Seminar in Sweden

Hamburg, 15th January 2015. The IWMA year starts with a seminar in Lund, Sweden, at the University of Lund on 12th March 2015. Title of the event will be: “Scandinavian Water Mist Seminar – Technical Update & Approval Status”.

This one-day seminar will include sessions on acceptance, standards and guidelines as well as presentations which show systems in practice. The final hour of the day will be allocated to group discussions. Here the experts will be available for debates and questions.

“During the seminar interested parties will receive diverse information on water mist”, says Bettina McDowell, Association Secretary. She explains: “The speakers will talk about approvals and research, but also about where water mist can be implemented and applied. And there will of course also be news on standards and guidelines.”

During an exhibition the delegates will be able to look at brochures and products of several companies involved in water mist.

The speakers will give all presentations in English.
