Webpage for IWMA Water Mist Seminar in Poland online

Hamburg, 10th August 2017. The first Water Mist Seminar in Poland will be held in Cracow (Galaxy Hotel) on 15th November 2017. Organizer of the event is the International Water Mist Association (IWMA).

The webpage for the seminar in Cracow has now been activated and can be accessed via the IWMA homepage. There will be no admission fee for delegates and those who want to learn more about using smaller droplets, thinner pipes can get their ticket now.

“We want to promote the technology, we go places – like Cracow”, says IWMA General Manager Bettina McDowell. She adds: “We offer seminars worldwide, because water mist companies need a reliable partner to educate and to spread the message.”

During this one-day event speakers will explain how water mist works. They will talk about projects and installation and maintenance requirements. Delegates will be able to update their knowledge on standards, guidelines and approvals. The seminar will be accompanied by an exhibition.
